#### WHERE WERE THEY BEFORE WORKING WITH US?

The auto dealer had great exposure to walking and drive-by traffic, which had sustained their revenue for several years

## THE PROBLEM

#### WHAT PROBLEM WERE THEY FACING?

The dealership was facing increased competition, not nearby, but from online competitors. They knew they had to make a shift and start generating demand online to stay up to date with the competition.

#### WHAT DID WE DO TO SOLVE IT?

We start by building a foundation for their online presence by creating the most important digital profiles for them, and prepared a detailed content and lead generation strategy to launch with.

We started with several experiments and deployed a data-driven campaign to drive inbound leads for auto consumers.

## THE OUTCOME

#### WHAT RESULTS DID WE ACHIEVE?

We were able to start collecting inbound leads right away, and within 2 months, were capturing qualified leads at well below market standards.

(market standard is around \$100-\$120/lead during a campaign).

#### **CLIENT IMPACT STATEMENT**

Not only were we able to drive a consistent and growing flow of leads to the client, they were selling vehicles to approximately 20% of those leads that came in because of the campaign.
